PREAMBLE

ESSEL PROJECTS PVT LTD is one of the fastest growing ETC Contracting Companies with a significant presence in industrial sectors of Power, Steel, Cement and infrastructure Projects throughout our Nation.

Essele Projects Pvt Ltd (EPPL) had been established as an ETC contracting company in early 2007 with an objective of developing a strong commitment to the project field of Electrical and Electro-Mechanical orientation and to become a part of our nation building activities. Till 2007, two sister concerns, proprietorship companies of same management namely ESSEL ENGINEERING & ESPEES ENGINEERING, had been carrying out Erection, Testing & Commissioning of EHV Substation up to 400 KV, Plant Electricals for Power and Steel industries including installation of EHV transformers, HT, LT Cable laying, as well as Fabrication, Erection of Heavy and Medium Steel Structures for similar industries and other related jobs in almost all over India.

After the emergence of ESSEL PROJECTS PVT LTD as an ETC company, we brought these two component companies (ESPEES ENGINEERING & ESSEL ENGINEERING) under one roof and consolidated our business strength. We have successfully completed several important Electrical & Electro Mechanical Projects for our customers and clients like ABB, L&T, AREVA, SIEMENS, ABHIJET, VISA STEEL etc. by adopting latest creative techniques. We have accomplished this by integrating the engineering knowledge with pioneering skills and also by optimum utilization of men and material by giving utmost importance to SAFETY and QUALITY.

For our systematic approach towards every assignment with commitment, the company has been certified under ISO 9001-2000 in 2008 and further renewed by 9001 -2008 in 2011.

We have been obtaining many valuable projects of EHV Substations, Plant Electrical and Structural fabrication from our valued customers and clients and many of those projects are in the verge of completion stage. Lists of ongoing projects as well as completed projects have been enclosed herewith for ready reference.

Our Work/Fabrication unit at Bhilai Heavy Industrial Estate with modern technical facilities provides us customized support for all our projects, related to fabrication and services.

We are proud to state that, we are being counted among the leading service providers to be reckoned with in the Electrical & Electro Mechanical sphere and enjoy a strong showcase of the valuable appreciations from our customers.

It is very special to mention here that for our commitment towards SAFETY & QUALITY we have been awarded with the certificate of PREFERRED CONTRACTOR by ABB in the year of 2009 and we still maintain the same.

We don't have any marketing policy other than "our satisfied customer will do the marketing for us"

We put forth our credentials for your own evaluation of our claims.

With Regards.

K. Pradeep

Director

OURVISION

We visualize ourselves as a major EPC contractor in the field of Engineering Services for Project construction with related Engineering and Procurement Services in the years to come. Our aim is to expand our horizon by using our rich experience, commitment to quality and safety standards, maintenance of timely delivery schedule of goods and services through our competitive strength and familiarity with local working conditions, customer-contractor relationship and strategic partnership with corporate social responsibility.

OURMISSION

At ESSEL PROJECTS PVT LTD., we are committed to perform for our customers providing them with the highest level of quality services at fair market competitive prices.

To ensure the longevity of our company through repeated business and referred clients achieved by customer satisfaction in all aspects, including time lines, attention to details and service-minded attitudes.

Our mission is to excel by taking up challenges in hand with due diligence along with the highest levels of professionalism, integrity, honesty, by using an innovative approach towards uncompromising transparency, fairness and team spirit with our customers, suppliers, subcontractors and professional associates.

SAFETY & HEALTH POLICY

ESSEL acknowledges and accepts its statutory responsibilities for securing the health, safety and welfare of all its employees, associates and others involved in the activities of the company.

It is the endeavour to maintain the highest standard of Health, Safety & Environment for all our operations. Safety is considered of prime importance and gets riding priority over all other activities. We will keep up to date and comply with The Health & Safety at Work Act and all other relevant legislations that impact upon our operations.

We done it by educating, constant monitoring and giving full support to our managerial and down the line engineers, technician and others involved in the operations.

OUR THINKING ABOUT SAFETY

1. Safety means a complete understanding work and knowledge of every step that must be taken and the realization that mistake could be costly to yourself and to the company.
2. Safety means good judgment. Never rely on luck; always be prepared to cope with unexpected situation and being alert when following your routine.
3. Safety means consideration for the family that depends on you, for the company that employs you, and for your own welfare.
4. Safety means remembering the safety rules set up by your company and applying them continuously when you are on the job.
5. ONE SINGLE RISK TAKEN MIGHT MEAN AN ACCIDENT FROM WHICH YOU NEVER RECOVER

MISSION

Design to protect

1. Personal
2. Environment
3. Public
4. Operation & Instrument

VISION

To maintain

1. Zero accident.
2. 100% commitment
3. Maximum Productivity

SAFETY POLICIES

1. All employees, contractor's employee and other entering plant for work shall be trained to work safely.
2. All leaders shall demonstrate care of people by conducting safety observation and propagate safety awareness at every opportunity.
3. All unsafe condition must be reported, investigate and action completed.
4. Every job shall be assessed for the risk involvement shall be carried out as per procedure/ checklist/ work permit and using proper personal protective equipment.
5. Each line function is responsible for preventing injuries and illness while safety functions responsible to improvement of safety system.
6. Provide and manage the rehabilitation of injured/ill employees.
7. Including safety as a part of management performances review.
8. Documentation and measuring effectiveness.
9. Recognize, reward and promote employees who demonstrate positive safety behaviors and take personal responsibility for their safety and those around them.
10. Allocate adequate resources to fulfill the aims of this policy

ENVIRONMENTAL POLICY

Essel Projects Pvt. Ltd. recognizes and exhibits concern towards the environment as an integral and fundamental part of our business strategy.

Our commitments:

- A program for continuous improvement and sustainability by encouraging sound environmental management systems to be adopted within our Integrated Management System (IMS) ensuring sufficient resources available for their implementation in an attempt to reduce greenhouse emissions.
- We ensure meeting and exceeding the minimum compliance of all relevant environmental legislation, regulations and standards.
- Preventing pollution and reducing any impacts of the Company's operations on the environment and local communities by assessing them in advance and implementing mitigating strategies.
- Developing objectives targeting to measure the extent of all potential significant environmental aspects and monitoring improvements achieved.
- Developing meaningful indicators for the company's improvement by reporting information on energy, waste and fuel consumption.
- Operating and maintaining vehicles that minimize toxic emissions through selection and management of our fleet strategy.
- Providing relevant training programs of informing and instructing all management and employees to increase awareness ensuring their ability to perform duties whilst improvising the company's performances.
- Continuously reviewing all procedures and updating employees, suppliers and sub-contractors accordingly.

QUALITY POLICY

At Essel Projects Pvt. Ltd., every member of the business shares its responsibility towards quality and quality improvement.

Therefore:

Company Managers and Engineers, through their own practices and standards will endeavor to lead by example. They will be committed and will be allocating the necessary resources towards the quality policies and programs initiated.

Everyone has got scope in contributing towards continuous quality improvement. This will generate effective conditions for staff to participate creatively in the improvement activities.

To accomplish these objectives, Essel Projects Pvt. Ltd. has established a documented implementation cell maintaining an effective Quality Management System within its Integrated Management System (IMS) aimed at 'getting it right at first time' rather than 'inspecting poor quality out'.

Our aim is to delight customers and develop relationships with all our suppliers and client internal and external, working in partnership to meet the supply chain and execution requirements providing significant success within the quality policy.
